

## ALGE STSn START GATES

Alge's flagship start gate just got better thanks to its new ultra-durable wand assembly!

### OVERVIEW

Alge's **STSn** series of start gates has been proven over and over during the course of the last decade. Whether you run Nastar or World Cup, Alge has a startgate that will exceed your expectations for quality & reliability.

### DESCRIPTION

- All models now equipped with stainless steel 10mm threaded insert (requires 17mm wrench)
- Extremely close machining tolerances make this gate among the best in the business
- Features include dual timing system inputs to respect FIS requirements (certain models only)
- Built-in speech amplifier for Q34 or HS-1D headsets (certain models only)
- Models feature both manual-cocking and auto-return
- Simple chain-wrap fastener for 4x4 start posts (recommended)
- Heavy duty polycarbonate housing and machined aluminum lever
- Headset-equipped models feature internal 9V battery that normally lasts an entire season

### ACCESSORIES & ADD-ONS

Certain models of the STS startgate series are compatible with the following products:

### MODELS AVAILABLE

PST stocks the following models of **STSn** series startgates:

- **STSnA1** Auto-return, single-contact, no speech capability
