

ALGE S4 TIMER

OVERVIEW

The venerable Alge S4 Timer continues to provide the hard-to-beat combination of exceptional reliability, ease-of-use, and economical pricing in a compact desktop form factor.

DESCRIPTION

- Extremely accurate timebase based on Alge's temperature-compensated quartz crystal
- Three timers in one! S4 features three completely independent timing channels, so you can simultaneously time three competitors on the same course without the need for computers or software
- Excellent when used as a timebase in conjunction with a PC-based timing solution
- **18-channel capability**
- RS-232 output-capable
- User-selectable baud rates for compatibility with numerous aftermarket software packages
- Supports scoreboard-output
- huge memory -- up to 8,000 splits
- **Printers:** works with Alge printer models **P4 & P5**, and **Seiko DPU-411/414**
- High tolerance to weather extremes -- rated from -20C to 55C (-4F to 122F), but we've used this device in -40C (-40F) with no problems, though we recommend the printer be turned off to conserve batteries
- Built-in speech amplifier for use with Alge **Q34** headsets
- Works with either internal rechargeable batteries or alkalines (6 x "D")

ACCESSORIES & ADD-ONS

The S4 is compatible with the following products:

- **Printer- P4**
- **Printer- P5**
- **Printer- Seiko DPU-411**
- **Printer- Seiko DPU-414**
