

ALGE STARTBEEP

The Startbeep STB1 was developed to provide coaches, trainers, and clubs with an inexpensive alternative to the Startclock ASC1.

OVERVIEW

The ALGE Starbeep is an extremely useful little piece of equipment -- even on the World Cup ski tour we always kept a couple of these handy. They feature remarkably intelligent circuitry that allows for many different automatic or manual countdown modes. Powered by a single 9V battery, they emit BIG sound and last forever on a single battery. A must for your goodie bag!

DESCRIPTION

- 9 user selectable start intervals (10, 15, 20, 30, 40, 45, 60, 90, 150 sec.)
- Two user programmable start intervals
- Selectable warning tone ten seconds before the start
- Start gun function with tone (Athletics or Swimming)
- Small form factor
- Fastens with standard Alge chain bracket
- Simple design with complete instructions printed right on the horn
- Operates on internal alkaline or rechargeable battery
- Can generate a start impulse at the selected zero time

COMPATIBILITY STATEMENT

This product is fully compatible with all existing **Alge & PST** products.
