

DISPLAY TRIPODS

Heavy duty yet lightweight, these professional-grade tripods are perfectly suited for your PST displays

OVERVIEW

Back when we first designed our first PST display, we used the Ultimate Support tripod system as the model for our support stand. As PST displays have evolved over the years, so has the Ultimate tripod, so that our displays work with these tripods as well today as they did way back then!

DESCRIPTION

- **Multiple uses!** Tripods are designed for use with **PST displays**, but they also work great for **Startclocks**, or for photocell stands in dryland applications (**Athletics**, **Showjumping**, etc)
- High-strength extra-wide aluminum tubing makes this tripod extremely light yet extremely strong
- Super-strong glass-reinforced polycarbonate telescoping collar has a die-cast metal clamp for maximum security and durability
- Telescoping tube stop increases safety and prevents accidentally pulling out the center tube
- Secure die-cast metal leg collar provides maximum strength and durability -- the closure lever is preset to the proper tension for easy set-up
- The rubber footcaps won't fall off!

COMPATIBILITY STATEMENT

This product is fully compatible with all **PST** display products that employ tripod sockets.
